

MSW Interactive Designs LLC

We put the web to work for you!

WEBSITE DESIGN, MOBILE SITE DESIGN, & WEB HOSTING

Hiring a professional to design and host your website makes ALL difference!

You are a plumber, a realtor, an auto-repair shop, etc ... in other words, you SPECIALIZE in the service you provide. You aren't a web designer, nor should you be. Just as there is training, education, experience, and special expertise that make you the best at what you do, so it is with website design! **Hire a professional for professional results.**

- A professional knows how to optimize images to load quickly and look professional
- A professional knows how to optimize the website for the best possible search engine rankings
- A professional has training in building user-friendly navigation
- A professional knows how to build and implement appropriate calls to action
- A professional knows how to actually **put the web to work** for your business

Custom Website Design & Hosting Rates

Website Design : \$195 per page, one-time design fee

\$50 one-time server setup fee

\$30/month hosting (includes free basic updates ... and this is huge!)

We now build responsive, mobile-friendly websites, but sometimes a stand-alone mobile site is a better solution for a business. If you have a current site that is not mobile-friendly, having a stand-alone mobile site built (to meet Google's mobile friendly test) may be more cost effective. Or, if you have a website with extensive navigation and a lot of content, a stand-alone mobile site may be a better solution for you so you can present simpler navigation and only select content to your mobile visitors.

Mobile Website Design : \$75 per page, one-time design fee

\$15/month hosting (includes free basic updates)
